

Vending Secure Card Reader

SCR200VM

Overview

Payment Express is the global leader in card acceptance systems for unattended cashless devices with over 30,000 machines connected to its network. Payment Express owns the hardware design, intellectual property and processor platform, ensuring end to end accountability from card swipe to bankcard provider. The SCR200VM is an EMV compliant Secure Card Reader (SCR) for the vending environment. It supports Magnetic Stripe, ICC (chip card), and Contactless (NFC) payment types.

In addition, you also benefit from our comprehensive fleet and transaction management tools, available in real time via the internet.

FEATURES & BENEFITS

- LCD display
- Cancel button
- Hybrid chip & magnetic stripe reader
- Contactless capable 
- MDB integration
- DEX data support
- End-end encryption of card data
- Extremely fast processing time
- Supports closed loop payments
- Employs 3DES encryption with tamper detection and card skimming mitigating security systems
- Secure FIPS140 rated Micro with Active tamper
- Full track 2 encoding to PCI DSS
- Designed to combat skimming attacks
- Built-in quad band modem
- Far smaller than other EMV compliant card readers
- Designed to meet PCI 3.1 SRED standards
- Feature rich API
- End to end message encryption
- Rapid response time – sub 3 second online Authorization

SOFTWARE

- In-built modem to authorize transactions over networks such as CDMA/GSM as well as the ability to process wireless payments
- Real time monitoring and proactive alerting systems
- EMV type 25 for unattended transactions
- 24*7*365 Support
- Faster Payment Service
- No single point of failure and almost unlimited layers of redundancy
- Payment Express has it's own configurable EMV kernel ensuring EMV upgrades are achieved easily with a very low cost
- Software updates and new features are deployed remotely

APPROVALS

- EMV Level 1 & 2
- PCI 3.1 SRED
- EMV (online and offline)
- EMV Type 25
- NAMA
